Description

BRCA Approved

In collaboration with PHATS bodies we have our new GTM GT12 body.

With GT12 being a limited power class we have taken every effort to ensure the GTM body is as efficient through the air as we possibly can. Key factors have not only been high speed steering or balance but to produce a body that really maximises its aerodynamic attributes.

Made from 0.7m lexan with protective film

Comes with Window and light masks.
