Description

Introducing the Contact RC foam tyre truer.

The V2 version has improvements in the sliding mechanism for more accuracy and ease of use.

New V3 version includes all the great features of the V2 but with thicker wires, fuse circuit and improved quality switch.

This Contact tyre truer is a manually operated unit made from robust materials, including an excellent carbide cutting bit, usually found on much higher priced truers.

Special 'Quick Skim' feature to allow fast surface refresh of the tyres.
(The cutter can be moved by hand rather than turning the wheel)

Available with or without attractive carry bag.

- Suitable for 1/8th down to 1/12th sizes.
- Carbide cutting blade included.
- 12 volt DC input, with leads included. (Power supply required).
(If using a power supply we recommend a minimum of 10A)
 - Plexi glass cover.
 - Powerful motor.
 - Universal fit arbors.
- Arbor not included, various types available separately.
 - +- 3 deg cone adjustment.

Part Number G48 needed with this item
