### Description

- **The S-U300 is FUTABA's first S.BUS2 standard servo. Here you get the legendary FUTABA quality at a highly attractive price. The powerful universal servo with 4.5kg/cm torque (6.0V) uses wireless assembly technology and is therefore particularly resistant to vibrations. The reset potentiometer has a 6-way sliding contact with indirect drive. The FUTABA S-U300 Servo replaces the previous S3003, S148, FS100 and S3005 servos.**

#### Features:

- Powerful S.BUS2 digital servo with plastic gears
- Robust plastic housing
- High resolution
- High repeat accuracy
- Low-wear potentiometer with indirect drive

NOTE: Bulk package excludes box and instructions but includes accessory pack containing grommets, ferrules, servo horns and mounting screws.
